

ON-GATE LIGHTING SYSTEM FOR SLIDE GATES

Introducing V Lite... the first and only induction-powered lighting system engineered specifically for slide gates. Powered by a patented electromagnetic transfer system — without batteries, solar panels, or retractable cables, V Lite installs directly on VMAG automated slide gates and delivers enhanced visibility and safety, helping to alert traffic and significantly reduce costly gate-related accidents. V Lite is ideal for high-traffic commercial and industrial applications where safety isn't just improved — it's instantly visible, making every gate system smarter and more secure. **From VMAG, the trusted leader in high performance gate automation.**

Standard V Lite Kit for 20' Opening

Features & Benefits

- **The only induction-powered “on-gate” lighting system for automated slide gates.**
- **Improved driver awareness:** *Dual sided LED arrays for increased reaction time - night or day.*
- **Reduced liability:** *Lowers risk of collisions, downtime, and repair costs.*
- **Maintenance-free power transfer:** *No retractable cables, batteries or solar panels to repair or replace.*
- **Easy installation:** *Installs on new or existing VMAG automated slide gates. Configurations available for larger openings.*
- **Built for industry:** *Rugged IP-rated design for heavy-duty commercial and industrial use.*
- **Multiple options for LED activation:** *Flashing or always on. Closed position or constant*
